reference. Future scholars will wonder how anybody managed without the Wellesley Index. It will quietly change the whole nature of Victorian studies.' Christopher Ricks, *New Statesman* 'It is now impossible to think of Victorian literary and historical studies without the benefit of it ... this is a very remarkable achievement indeed ... the complete set will be a monument to the Houghtons foresight, pertinacity and skill.' *Ada Lovelace* Beverley Adams, 2023-04-06 The name Ada Lovelace perhaps is not a name that you would automatically link to computer science but she was in fact the first person to create a computer algorithm. Working with the renowned scientist Charles Babbage, Lovelace translated a set of notes on Babbage's new mechanical computer, The Analytical Engine and discovered that in fact it could be programmed to do more than mere mathematical calculations. Lovelace may have been a mathematical genius but as the only legitimate child of the poet Lord Byron she was also a figure of great scrutiny. Abandoned by her father at just four weeks old, Ada endured a strict childhood in the care of her mother who was adamant that her daughter would not inherit the so-called Byron madness. She ensured Ada was denied all things that were considered exciting and was pushed more towards the logical subjects such as science and mathematics. Did this strict approach work? Or, did Ada Lovelace inherit more than her genius from her father? Ada was many things, a daughter, wife and mother but above all that she was an inspirational woman, one who defied Victorian ideals by entering the field of mathematical studies and by achieving greatness that is still recognized today.
